SINH DANG (FULL-STACK DEVELOPER)

Ho Chi Minh| 0586288848| sinhdang2006@gmail.com

SUMMARY

With over 6 years of experience working on large-scale projects for both local and international clients, I bring a diverse skill set and a strong foundation in software engineering. I am now seeking new challenges to further develop my expertise. I believe that becoming a proficient software engineer is not about mastering multiple programming languages, but about developing strong logical thinking and a deep understanding of fundamental principles.

WORK EXPERIENCE

Full-stack developer, SourceCode (Remote)   **July 2022 - Now**

Team Size: 16 developers & QA + 12 from the client side

Responsibilities:

- Led the development of new features for a customer portal.
- Implemented a wide range of user and admin-centric functionalities.
- Coordinated with the team on solution coding and feature development.

Description:

- Contributed to building and improving small components and features, and resolved code issues.
- Worked on a project where users could manage funds, make requests, and invest.
- Developed features like shopping redirects and customer data management for quick product purchases or charges.
- Maintained thorough unit testing, achieving 100% coverage for all projects.

Technical Stack: NextJS 12, NestJS, Apollo Client, GraphQL, Postman, AVD, React Native (support module), Azure

Full-stack developer, Aperia (Remote)   **July 2020 - June 2022**

Responsibilities:

- Developed a compact module with intricate logic for the system.
- Implemented various features related to card functionality and data management.
- Communicated effectively with the team to discuss and refine coding solutions.
- Conducted thorough unit testing, achieving 100% coverage across all projects.

Description:

- Built and enhanced small components and features, addressing complex code issues.
- Worked on projects involving debt, loans, and credit cards, focusing on user information management to improve customer interactions.
- Tackled complex logic within system modules, particularly for card-related features and data management.
- Collaborated closely with the team to ensure effective and cohesive coding solutions.
- Maintained a rigorous approach to unit testing, achieving 100% coverage.

Technical Stack: ReactJS, Redux, NodeJS, MongoDB, Redux Toolkit, TypeScript, Custom Component Design

Frontend developer, Carp Tech   **Oct 2019 - June 2020**

Responsibilities:

- Developed a comprehensive system for pricing calculations and debt loan management.

Description:

- Led project initiation, built components, implemented features, and resolved code issues.
- Designed and implemented a system for buying and selling real estate, apartments, and furniture.
- Successfully created a system for calculating user prices and managing debt loans.

Technical Skills: ReactJS, Antd, Redux, TypeScript

Frontend developer, Ads Plus CRM   **Mar 2018 - Oct 2019**

Team size: 4 developer

Responsibility:

- Build a system to calculate the price and debt loan for the users.

Description:

- This is a cluster that included multi-e-commerce web applications that served many domains such as academics, real estate, advertising, shopping, business... Based on every single specific demand of the client, we modify and adjust our own features to be suitable with the client's business and optimized those old manual procedures which could help increase productivity.

Technical Skills: Wordpress, PHP, ReactJS, Javascript, JQuery

EDUCATION

Major: Information Technology   **2014 - 2018**

FPT Polytechnic

ADDITIONAL INFORMATION

- Lead small team, around 5 member
- Working with BAU role: Collect requirement, clear requirement for teammate, planning for release, deploy to prod, manage teammate, ...
- My knowledge: React, Nextjs, Nodejs, Nestjs, Graphql, Mongodb, Postgres, Jenkins, Docker, Azure, AWS server ,Devops experience
- My passion: likely learning new technologies
